

Fare Free Greater Manchester

Fare Free Greater Manchester is campaigning for fare-free travel for everyone in Greater Manchester.

Scrapping fares would increase usage, reduce the cost of living, cut congestion, pollution and litter, improve accessibility, reduce social inequality and isolation, cut violence on the transport network, and benefit the night-time economy.

We support steps towards fare-free public transport which defend and extend jobs and services, whether that is an expansion of fare-free services, wider eligibility for fare-free travel, or workers demanding travel passes from their employer. We want to see improved and expanded public transport services.

From Kansas City to Belgrade and Brazil to Luxemburg, many cities have fare free public transport - why not us?
